

AVANTIKA

Hanumangarh, Rajasthan | +91 89495-01491 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | bishnoiavantika1@gmail.com

PROFESSIONAL SUMMARY

Data Scientist with hands-on experience building end-to-end machine learning systems in churn prediction, recommendation systems, and phishing detection. Skilled in Python, SQL, Machine Learning, NLP, Computer Vision, A/B Testing, Explainable AI, and dashboard development.

KEY SKILLS

Programming: Python, SQL

Data Analysis: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau

Machine Learning & Deep Learning: Scikit-learn, XGBoost, PyTorch, HuggingFace Transformers, Deep Learning, NLP, Computer Vision

MLOps & Deployment: Streamlit, FastAPI, HuggingFace Hub, Git, GitHub, Google Colab

Explainable AI: SHAP, Grad-CAM

PROJECTS

Q-Comm Market Basket Analysis

[GitHub](#)

- Built an end-to-end market basket analysis pipeline on 3.4M Instacart orders, simulating recommendation systems for quick-commerce platforms like Zepto and Blinkit through association-rule mining, customer segmentation, and product embeddings.
- Caught and fixed a hidden data-sampling bug that was inflating results, then shipped a FastAPI backend and a 4-page Power BI dashboard to track the corrected purchase patterns.

Tech: Python, SQL (DuckDB), PyTorch, FastAPI, Streamlit, Power BI, Git

Indian Telecom Churn Analysis

[GitHub](#) | [Live Demo](#)

- Built an end-to-end churn prediction pipeline on 10,000 synthetic Indian telecom subscribers calibrated to real Jio/Airtel/Vi/BSNL market share, Selected Logistic Regression over Random Forest for superior churn recall on imbalanced data.
- Ran a 10% discount voucher A/B test (n=3,163) that cut churn by 45%, then used treatment-effect analysis to find one subscriber segment where the discount didn't work at all, saving ₹50K; deployed as an interactive Streamlit dashboard with live risk scoring and SHAP explanations.

Tech: Python, Scikit-learn, XGBoost, SHAP, Plotly, Streamlit, Git

PhQure — Phishing & Quishing Detection System (M.Sc. Dissertation)

[GitHub](#) | [Live Demo](#)

- Built a multi-modal phishing and QR code quishing detector combining three independent branches (URL features, QR images, raw text) fused through a meta-learner; deployed live with the fine-tuned model hosted on HuggingFace Hub.
- Individual branches hit up to 99.97% AUC, and the fusion layer automatically learned to downweight the one branch that was overfitting, validating the multi-branch design.

Tech: Python, PyTorch, XGBoost, HuggingFace Transformers, SHAP, Streamlit, GitHub

EDUCATION

Central University of Haryana, Mahendragarh, Haryana

June 2026

Master of Science (Data Science) | CGPA: 8.10/10 | First Class with Distinction

- Relevant coursework: Data Analysis, Machine Learning, Statistics, Artificial Intelligence, Big Data Analytics
- Dissertation — PhQure: Phishing & Quishing Detection System; Grade: A+

Sophia Girls' College (Autonomous), Ajmer, Rajasthan

July 2019 – June 2022

Bachelor of Science (Mathematics) | CGPA: 8.92/10 (83.87%)

CERTIFICATIONS

Certified in Cybersecurity (CC) — (ISC)²

Aug 2025

- Gained knowledge in security principles, incident response, network security, and security operations.

ACTIVITIES

- Coding Club, Central University of Haryana — Committee Member
- SWAN (animal and nature society), Central University of Haryana — Committee Member
- Abdul Kalam Forum, Sophia Girls' College (Autonomous) — 3rd year representative
