

AVANTIKA

Hanumangarh, Rajasthan | +91 89495-01491 | bishnoiavantika1@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Scientist with hands-on, end-to-end machine learning experience spanning multi-modal fraud detection, causal inference and A/B testing, and large-scale recommendation systems. Skilled in Python, SQL, deep learning, explainable AI, and production deployment (FastAPI, Streamlit, Hugging Face Hub). Known for catching subtle data and modeling bugs before they reach production.

KEY SKILLS

Core: Python, SQL, Scikit-learn, XGBoost, PyTorch, Hugging Face Transformers, Statistical & A/B Testing

ML/DL Specialties: NLP, Computer Vision (EfficientNet, DistilBERT), Explainable AI (SHAP, Grad-CAM), Feature Engineering, Model Evaluation

Engineering & BI: FastAPI, REST APIs, ETL/CI-CD Pipelines, Power BI, Tableau, Streamlit, Git/GitHub, DuckDB

PROJECTS

PhQure — Phishing & Quishing Detection System (*M.Sc. Dissertation Research*) [GitHub](#) | [Live Demo](#)

- Engineered a multi-modal phishing and QR-code quishing detector fusing three independent branches (URL features, QR images, raw text) through a meta-learner, deployed live with the fine-tuned model hosted on Hugging Face Hub.
- Pushed individual branches to up to 99.97% AUC; validated the multi-branch design by confirming the fusion layer automatically learned to downweight the one branch that was overfitting.

Indian Telecom Churn Analysis [GitHub](#) | [Live Demo](#)

- Designed an end-to-end churn prediction pipeline on 10,000 synthetic Indian telecom subscribers calibrated to real Jio/Airtel/Vi/BSNL market share; selected Logistic Regression over Random Forest for superior churn recall on imbalanced data.
- Ran a 10% discount voucher A/B test (n=3,163) that cut simulated churn by 45% in a controlled experiment, then used treatment-effect analysis to isolate one subscriber segment where the discount had no effect, avoiding ₹50K in unnecessary spend; deployed as an interactive Streamlit dashboard with live risk scoring and SHAP explanations.

Q-Comm Market Basket Analysis [GitHub](#)

- Built an end-to-end market basket analysis pipeline on 3.4M Instacart orders, simulating recommendation systems for quick-commerce platforms like Zepto and Blinkit through association-rule mining, customer segmentation, and product embeddings.
- Diagnosed and fixed a hidden data-sampling bug that was inflating results, then shipped a FastAPI backend and a 4-page Power BI dashboard to track the corrected purchase patterns.

EDUCATION

Central University of Haryana, Mahendragarh, Haryana

July 2024 – June 2026

Master of Science (Data Science) | CGPA: 8.10/10 | First Class with Distinction

Sophia Girls' College (Autonomous), Ajmer, Rajasthan

July 2019 – June 2022

Bachelor of Science (Mathematics) | CGPA: 8.92/10 (83.87%)

CERTIFICATIONS

Certified in Cybersecurity (CC) — (ISC)²

Aug 2025

- Gained knowledge in security principles, incident response, network security, and security operations.

ACTIVITIES

- Coding Club, Central University of Haryana — Committee Member
- SWAN (Animal and Nature Society), Central University of Haryana — Committee Member
- Abdul Kalam Forum, Sophia Girls' College (Autonomous) — 3rd Year Representative
